c. Geopolitical analysis

1. Social/cultural/demographic elements

Indonesia is a very diverse country with around 300 native ethnic groups and 719 languages and dialects. The Javanese culture is the most frequently found across the nation due to the transmigration policy. However, 58% of the population lives on the island of Java, the world’s most populous island.

2. Political Scenario

Indonesia is a republic with a presidential system. The power is concentrated in the central government with delegation down to provincial and district/city levels to create their own regulations as

1 https://www.ethnologue.com/country/ID
2 Guinness World Record http://www.guinnessworldrecords.com/world-records/highest-population-island
long as it is not conflicting with the national regulation. Since 1999
Indonesia has a multi-party system. The head of state is the president
and is elected directly by the people since 2004. The current president
is Joko Widodo (Jokowi), who was first elected in 2014 and got re-
elected again as President of Indonesia in the 2019 general election,
this time with a prominent Muslim cleric, Ma’ruf Amin as Vice President.
The president and the vice president can only be elected for a maximum
of 2 terms; therefore, this will be the last term for Jokowi.

3. Economic elements

Indonesia has the largest economy in Southeast Asia and is a member of
the G-20. After 1998 economic and social crisis, the economy has
recovered and growth has accelerated to over 4-6% in recent years. In
2016, Indonesia’s debt to GDP ratio was 31.4%. Agriculture remains a key
sector but Indonesia cannot rely on oil anymore, and has now become a
net oil importer. Indonesia has cut the poverty rate to more than half
since 1999 to 9.4% in 2019. However, the good economic growth is
hampered by corruption at various levels. The government has enacted
some programs which should reduce corruption such as the Corruption
Eradication Commission (KPK) establishment. In 2019, Indonesia launched
Indonesia Agency for International Development, an endowment and
development fund aimed to support in reducing poverty and social
inequality around the world.

Summary of HI presence in
the country

HI started its activities in Indonesia in January 2005, just after the
earthquake and tsunami which devastated Aceh Province in December 2004.
Between 2005 and 2009, HI’s main partner was the Ministry of Health,
before switching to the Ministry of Social Affairs (MoSA) from 2010
until now. Initially HI’s program focused on post-emergency programs and
rehabilitation (physio and P&O), following the earthquake and tsunami in
Aceh, and continued with livelihood, advocacy and inclusion. The program
then expanded to other areas mainly around Yogyakarta, and the country
office then moved to Yogyakarta in September 2005 until now. National
level programs have included the support towards ratification of UNCRPD
(which was ratified in 2011), and development and education of local P&O
services until 2008. The program also responded to major disasters i.e.
the earthquake and tsunami in Padang in 2008 (managed by then DAH),
Merapi eruption in 2010 and earthquake tsunami 2018 in Central Sulawesi,
and some smaller responses. After 2012, the program moved towards DPO
capacity building and promotion of cooperation between CSOs (including
DPOs), DRR, inclusive local development, livelihood, education and health.
